TROUBLESHOOTING	
Alexa, what type of device are you?	I am Alexa and this is an Echo Dot I am Alexa and this is an Echo Show
Alexa, what is your device name?	My name is "John's Living Room"

Wake Up Word | Available wake up words are Alexa, Amazon, Echo, or Computer. Go to **"Settings"** > **"General"** > **"Wake Word"**.

Follow Up Mode | Allows you to make more requests without repeating the wake word. The blue indicator light on the Echo device remains on for a few seconds, letting you know Alexa is active and ready for your next request. After a few seconds of silence, the blue light will disappear and commands will not be processed unless you activate the device again by saying a Wake Word. Go to **"Menu"** > **"Settings"** > **"Select Device"** > scroll down to **"Follow-Up Mode"** and use the toggle to turn it on. This is available on Dot, Echo, Spot, and Show; not available on the Amazon Echo Tap.

Do Not Disturb | Alexa timers and alarms won't disturb you when Do Not Disturb is turned on. A purple light will appear when activated. You can also schedule the time when Alexa won't disturb you. Go to **"Menu"** > **"Settings"** > **"Select Device"** > scroll down to Do Not Disturb.
